

Penemy of Pignorance

Feminimalism

It was May 21st, 5016. The univearth had experienced lots of transformnations during the past millenniums. Atombic wargument, wargot, and turm-oil did not exist between countries, and in fact all the borders between neighboring countries were cancelled and cleared, however, peace did not exist in the world because warguments of other sorts existed: maidemoiselles, women and wives had turned into harsh rivals and enemies for boys, men, and hus-bands. The two groups openly hated each other and each one's militarmy or harmy was on the alert to sinjure, tormentalyze and suffocage the opposite site.

On this fresh day, weathermometers showed 24 degree Celsius, and maidemoiselles, women and wives were holding feministic conferences in different parts of the univearth.

The following lines are the manifest read by one of the key-note speakers in one of the feminist conferences of that year held in Manhattan:

Sisters, World Women War I against men and hus-bands was fought in 21st century. The men and the hus-bands lost the war, and we were absolutely wardent and victorious. We had feministry and feministers, men madored our beautifiring eyes and this helped us to make them limitamed and have our most tight grip and contrull over them in that magnificentury. Next they got timidly marricaged, and we easily attackkicked, tormentallized and arrestied them. Many parts of the world which were called countries then, had female presidents and feministers and the number of female M.P. s was almost twice the number of male M.P.s. in most countries of the world.

In the next centuries, feminism alternatively won and lost its war against men. This means, World Women War II fought in the 22nd century was won by women, in 23rd century men were the winners, in 24th century women were the winners, in 25th men, in 26th women, and this alternative trend continued till the year 3000 since when unfortunaturaly we have not had any victories over men and hus-bands, and this issue has made men so proud of their long held victory, and more and more of us are getting disappointed and getting convinced that we cannot compete with and gain any victory over them anymore, and that we should accept our defeat and we should surrender to men and forget about having other wars with them in future.

After the key-note speaker finished her speech, the audience clapped for her and she took her seat.

Each year on May 21st and in these conferences, feminist researchers and writers were presenting I.S.I. or I Search Income papers and sharing the results of their studies with other women in these conferences.

In Harvard University, one hundred ninety eight papers were about history of feminism, and professor Ashley M. Jules' paper was selected by random to be presented. She was a blonde woman from the Women Studies department of Berkley University. She, dulligently presented her tiresome seventy minute lecture aided by PowerPoint slides. Few of the audience clapped for her, she thanked them and finished her presentation.

Next it was time for break, and then the conference went on.

One hundred seventy papers were about the possibility of victory over men in future, and professor Catrine L. Jones from Manchester University was chosen at random to present her hopetimistic sixty minute paper in this regard. Her presentation was also aided by PowerPoint slides. The audience clapped for her, she thanked them and finished her presentation.

Four hundred fifty two papers were about the impossibility of future victories over men and professor Carla Johnson's paper was selected at random to be presented to the audience. She was the head of women studies department of Texas University. The audience clapped for her, she thanked them and finished her presentation.

Next it was participeating and apprecieating lunch time, and after a short rest the conference went on.

Seven hundred twenty two papers were about the roots of men's victory over women since 3000. Mary F. Andrews, a Foxfortunate professor was selected at random to present her paper on this issue. She started her speech thus:

Sisters, during past millenniums, we have had female mathematicians, athletes, physicists, chemists, physicians, engineers, poets, writers, critics, professors, teachers, pilots, farmers, nurses, musicians, workers, etc. who in many cases did excel their male rivals. But unfortunatually for us, we have never had a thinker who has had the temerity to deform and manipulate Queenglish language to our benefit. Though our poets and writers claim to write in feminine style, their writings have not had tangibly beneficial results in our lives since 3000.

We, in the last millenniums, have had female scientists who excelled Newton, Galileo, Leonardo Da Vinci, and even Einstein. We have had philosophers deeper than Kant, Hegel, and Foucault, painters better than Picasso and Salvador Dali, poets and writers better than Keats, and Victor Hugo, and musicians better than Beethoven, Mozart, Bach, and Shubert. But sisters, in 3000, monuments and documents were discovered that show there was a grotesqueerie male thinker by the name of Vitalis Originatorabi who had a poorigin and lived in a place called Londowntown in 21st century and who triumelephantly handled and manipulated Queenglish words and landguage to the benefit of men who are our enemies and rivals. He holds the most crucial role in our defeat since 3000, and in men's long

held victory.

He is our topponent because he coined terms that pendamaged us most. Honestly speaking, we do not have such an imagenius thinker in the long list of our feminist writers' names. Sisters, fortunately, only part of the monuments written by him are textplored; his queerie terms have magically encouraging effects upon men, and disappointing effects upon some women.

Professor Mary F. Andrews added that some of Vitalis Originatorabi's coined terms that have pendamaged women are "marricage", "married", and diworth. She went on:

But sisters, researches show that one of Vitalis' terms has caused such a catastrophic blow to us and has had such a miracle result for our rivals that after discovery of the term in his textperimental writings in 3000, it has become almost impossible for us to gain any victory over men. Do you know what is the term that is his most importmanteau? Professor Mary F. Andrews asked the audience.

Some of them said "Don't know", and some said " No idea". Some of them nodded and it seemed they knew the answer. However, Mary F. Andrews said: "feminimalism". A shade passed over many of the audience's faces. Some of them sighed, some hid their faces in the palm of their hands, and some were wiping the tears on their cheeks.

Each year on May 22nd emancipation celebrations were held all over the univearth, and the following brief account is what went on in one of them which was attended by boys, men, hus-bands and of course by some women on May 22nd 5016, the day after women held their feministic conferences.

The speaker was a middle aged gentallman wearing a black jacket, white troushorts and khaki shoes. He began with a smile and said:

Welcome ladies and gentlemen. Let me begin by saying that we are glad that each year more and more women eagerly participate in these emancipation celebrations. Let's be brief and let's read the emancipation manifestorabi in honor of Vitalis Originatorabi, the one who is the creatorabi of terms that have brought us our long held freedom and victory over feminimalism. He lived in 21st century and we deplore the fact that though he wished his books to reach a universale, he remained unknown till 3000. However, fortunaturally, part of his textperimental writings, considered monuments now, were discovered around 3000.

Ladies and gentlemen, in the past eras, especially during the 21st century in the third millennium, men and hus-bands were oppressively contrullled and tormentalized by women. Women made us manxious and languaged and of course their aim was to sinsult and humilirate us and not to let us textplore and

discoverb terms like *feminimalism* which might emancipate us. But since the time of discovery of Vitalis Originatorabi's textperiments around 3000 we have been contrullers of our own destiny and have not remained languaged and marricaged.

Our enemies and rivals believe they have had many female mathematicians who excelled most male mathematicians, they believe they have had female athletes, physicists, chemists, physicians, engineers, poets, writers, critics, professors, teachers, pilots, farmers, engineers, nurses, musicians, workers, etc. who in many cases excelled their male rivals. But fortunaturally for us, they confess they have never had a thinker with originatorability and creativity to handle and manipulate Queenglish wordcabulary to their benefit.

The speaker added: women believe, in the last millenniums, they have had scientist who excelled Newton, Galileo, Leonardo Da Vinchi, and even Einstein, philosophers deeper than Kant, Hegel, and Foucault, painters better than Picasso and Salvador Dali, and poets and writers better than Keats and Victor Hugo, and musicians better than Beethoven, Mozart, Bach, and Shubert. But they know around the year 3000, monuments and documents were discovered that prove Vitalis Originatorabi lived in Londowntown in 21st century, and that he manipulated Queenglish wordcabulary and landguage to our benefit and this is what no female writer has ever accomplished. So, we can be proud that Vitalis Originatorabi coined terms that hit the hardest blow on feminimalism and on our feminimalist enemies and rivals.

The speaker finished his speech thus: altogetherfore, we owe our historical victory to the original thinker and championeer who released us from remaining languaged and marricaged. And this celebratoraby gathering and partea is to his honor!

In the partea, every buddy knew that May 22nd is the birthday anniversary of Vitalis Originatorabi, the one who managed, maneuvered, and manipulated Queenglish and Kinglish landguage and coined *feminimalism*, *marricage*, *married*, and *diworth* to help marricaged and victimized hus-bands get emancipated and the one who authoroughly and penthusiastically wrote to help poorphans who were evapoorating, and the one who wanted to penlighten the univearth in order to help humanimals, and to be Penemy of Pignorance.

Portmanteau words (portmantorabi words)

altogetherfore : altogether + therefore

apprecieating: appreciate + eating (enjoying foods) ----- arrestedied: arrested + tied(hands)

atombic: atomic + tomb ----- attackkicked: attacked + kicked

authoroughly: author + thoroughly ----- beautifiring : beautiful + firing

celebratoraby: celebratory + Torabi -----championeer : champion + pioneer
 contrull: control + rull ----- creativity: craetivity + vitality + Vitalis
 discoverb : discover verbs and new ideas
 diworth: divorce + worth ----- dulligently: dull + diligently
 every buddy: my pun on every body
 feminimalism: feminism + minimalism ----- creatorabi: creator + Torabi
 evapoorating: poor + evaporate ----- feminister : a female and feminist minister
 feministry: a ministry for women ----- fortunaturally: fortunately + naturally
 Foxfortunate: fox + Oxford + fortunate ----- gentallman: gentleman + tall
 grotesqueer: grotesque + queer ----- grotesqueerie : grotesque + queer+ eerie : strange
 harmy: harmful army
 hopetimistic: hope + optimistic ----- humanimals: humans + animals
 hus-bands: husband + bands
 Imagenius: imaginative + genius ----- importmanteau word : important + portmanteau word
 Kinglish: kingly + English-----landguage: language + land
 languaged: language+ cage (limited by language) ----- limitamed: limited + tamed
 Londowntown: London + downtown
 madore: madly adore somebody ----- maidemoiselles: maid + mademoiselle;
 magnificentury: magnificent century----- manifestorabi: manifesto + Torabi
 manxious : man + anxious ----- married: to seem older or aged because of marriage burdens -----
 - marricaged: caged (limited) by marriage ----- military : military + army ----- neighboring:
 neighbor + bordering
 originatorability: originality + originator+ ability + Torabi ----- partea : party + tea
 participeating: participate in eating ----- pendamaged : pen+ endamage (endamage by writing)
 penthusiastically : pen + enthusiastically ----- poorigin: originally poor
 poorphans: poor orphans ----- Queenglish: Queen + English
 queerie: queer + eerie (strange) ----- sinjure : sin of injuring others
 suffocage : suffocate + cage ----- textperimental: experimental text
 textplored: explore texts ----- topponent: top opponent (main opponent)
 tormentalize : torment + mentalize ----- transformnation: transformation + nation
 triumelephantly: triumphantly + elephant ----- troushorts: short trousers or long shorts
 turm-oil : turmoil because of oil ----- unfortunaturally : unfortunately + naturally

universale: universal sale ----- univearth: universe + earth

wardent: ardent for war ----- wargot : war + argot (war language)

wargument + war + argument

weathermometers: weather + thermometers ----- wordcabulary: word + vocabulary
